Result Analyzer Student Performance Predictor

RASPP – Competitor Comparison Report

This document presents a comparative analysis of the Result Analyzer & Student Performance Predictor (RASPP) against leading global and emerging academic analytics systems.

RASPP System Overview

System	Core Focus	ML Prediction	Explainable AI	Deployment	Pricing Model	Target Users	Customization
RASPP	Result analysis & performance prediction	Yes	Yes (SHAP)	Cloud / On-prem	Low / Per student	All Types of Educational Institutions	High
Power-School	Full SIS + analytics	Limited	Limited	Cloud	Enterprise quote	K-12 Districts	Low
Blackboard Analytics	LMS analytics	Limited	No	Cloud	Enterprise annual	Universities	Low
Civitas Learning	Student success & retention	Yes	Yes	Cloud	Enterprise quote	Higher Education	Medium
BrightBytes	District decision analytics	Limited	Limited	Cloud	Subscription	K-12 Leadership	Low
Gradescope	Assessment & grading	Partial	No	Cloud	Per student	Teachers	Medium
Knewton Alta	Adaptive learning	Yes	No	Cloud	Per course / student	Students	Low
Tableau / Power BI	Data visualization	No	No	Cloud / Desktop	Per user	Analysts & Admins	High

Key Differentiators of RASPP

Pricing Comparison (Indicative)

RASPP: **Academic prototype – pricing not finalized (Flexible / Institution-based)**
PowerSchool: Enterprise quote (often thousands USD annually)
Blackboard: ~ $9,500+ per year
Civitas Learning: Custom enterprise pricing
Gradescope: $1–$3 per student
Knewton Alta: ~$40–$80 per course per student
Tableau / Power BI: Free academic tiers or per-user licenses

Conclusion

RASPP provides **predictive analytics** with **explainable AI** in a **flexible and customizable system.** It is designed for **all types of educational institutions**, offering **intelligent decision support** without the complexity of enterprise-level solutions.
